

### **Who are we?**

Established in 1983, privately-held Pacific Market International (PMI) designs, manufactures and markets innovative food and beverage solutions designed for busy lifestyles. Our brands in the marketplace are Stanley, Aladdin, Migo, and Slant Collections. PMI is headquartered in Downtown Seattle. We also have offices around the world in Shanghai & Shenzhen, China; Rio de Janeiro & Manaus, Brazil; Manila, Philippines; Amsterdam, The Netherlands; and San Francisco & Bentonville, USA. More information can be found at [www.pmi-worldwide.com](http://www.pmi-worldwide.com). Thanks for checking out our full-time Design Engineer role.

### **Position Overview – Seattle Office**

As the Design Engineer you have excellent technical, written, and verbal communication skills. You have 5+ years experience in product development to act as a technical advisor to a cross functional team and are a critical link between great design and what's possible in terms of manufacturing.

### **You'll:**

- Provide technical leadership to industrial design and product management teams during initial product concept and design phases of product development process.
- Develop product specifications and validation plans.
- Conduct risk analysis for new product designs and perform competitive benchmarking and validation testing of new product prototypes.
- Assess new technology opportunities for products in development phase.
- Provide management of vendors in engineering and technical areas.
- Research and ensure patent protection on new product designs and other areas of intellectual property development.
- Travel internationally and domestically ~ 15%

### **As the Design Engineer we ask that you bring:**

- Good personal skills with the ability to effectively work with individuals and groups at all organization levels; ability to work independently and as part of a team.
- Ability to take initiative and prioritize tasks; good time-management, organizational, problem-prevention and problem-solving skills.
- Ability to work accurately with close attention to detail.
- Ability to maintain confidentiality of sensitive information.
- Willingness to adapt to changing business needs and deadlines.
- Ability to study and apply new information.
- Bachelors Degree in Engineering (preferably Mechanical).
- 5+ years experience in product design and manufacturing.
- 3+ years of experience with CAD (SolidWorks preferred).
- Working knowledge of injection molding, metal fabrications, paints and finishes, compression molding, materials, heat transfer, basic thermodynamics and other relevant engineering disciplines
- Working knowledge of 'Design for Manufacture' methods
- Experience with Asian factories preferred

### **Comprehensive compensation and benefits package including 401(k) plan.**
